Resume/CV

Paul Torgerson is a founder, director and the CEO & President of Grant Lake Corporation. He is the largest stockholder in the company. He is an expert in precious metals process design, mine development, mechanical, structural and electrical design, power generation and construction supervision. Mr. Torgerson has developed patents for alternative energy technologies and is a leading inventor involved in product designs for *DOE's Hydrogen Economy*.

Mr. Torgerson organized the Grant Lake Corporation acquisition of Diamond Gold Corporation's land assets and discoveries in the Yentna Mining District which includes Mineral Resource estimates for gold, silver, platinum, diamonds, and colored gems stones valued in excess of \$1B. He created the Grant Lake Corporation Mineral Resource and Mineral Reserve portfolio consisting of 2,958 acres and includes the Case Lode and Three Creeks Placer Mines, and the James Creek, Solar Mountain and Cabin Creeks gold prospects, in the Hope Mine District near Seward, Alaska, and the Fire Brick Lode Mine, Sable Mine, Kahiltna Placer Project, and Lake Creek Placer Mine in the Yentna Mining District south of Mt. Denali. Mr. Torgerson created the continued exploration drilling program, mining plan, and recovery plan for the Case Lode Mine. The plan consists of a 25-150 ton per day underground mine plan with onsite crushing and gravity separation of free gold and float cells for fine gold recover. At 50 tons per day the project estimated NPV is \$65M over a 11 year mine life, at 150 tpd, this same mine has a projected NPV of \$206M over 11 year LOM.
